

CGLN CLIMATE WEEK: Agriculture Session

'Sustainable Intensification:
an oxymoron?'

18th September 2023

6pm BST / 1pm EST

Online/

Speakers

Chloe Lewis | CGLN | Youth Advisory Councilmember for Agriculture (Moderator)

Chloe is an environmental specialist at Anglo American Crop Nutrients where I work with a talented team of scientists to re-imagine crop nutrition as it is seen today. Having achieved her Master's in Carbon Management, her professional goal is to actualise the full potential of the agricultural system in boosting biodiversity and removing greenhouse gases, potentially creating a net-negative system.

Rosalinda Guillen | Community to Community | Founder and Director

Rosalinda is Executive Director for Community to Community Development (C2C), a “a place-based, grassroots organization committed to creating alliances in order to strengthen local and global movements towards social, economic and environmental justice” in Bellingham, Washington.

Dr Pauline Chivenge | African Plant Nutrition Institute | Principal Scientist

Dr Chivenge is a Senior Scientist. Her research focuses on sustainable management of soil and nutrients in current and emerging irrigated and rainfed rice-based cropping systems. She has worked on diverse farming systems and topics that include biogeochemical nutrient cycling, natural resource management, carbon sequestration, GHG emissions and sustainable ecosystem functioning.

Prof. Domenico Dentoni | Montpellier Business School | Professor of Business, Resilience and Transformation

Dr. Domenico Dentoni is Full Professor of Business, Resilience and Transformation at the Montpellier Business School (MBS). In active collaboration with local and global societal stakeholders and students, his research seeks to understand, explain and enact how processes of organizing support the capacity of systems to bounce back, adapt, and radically change in the face of grand challenges.
